

WATER & AIR & ENERGY

ISHII

For comfortable environment

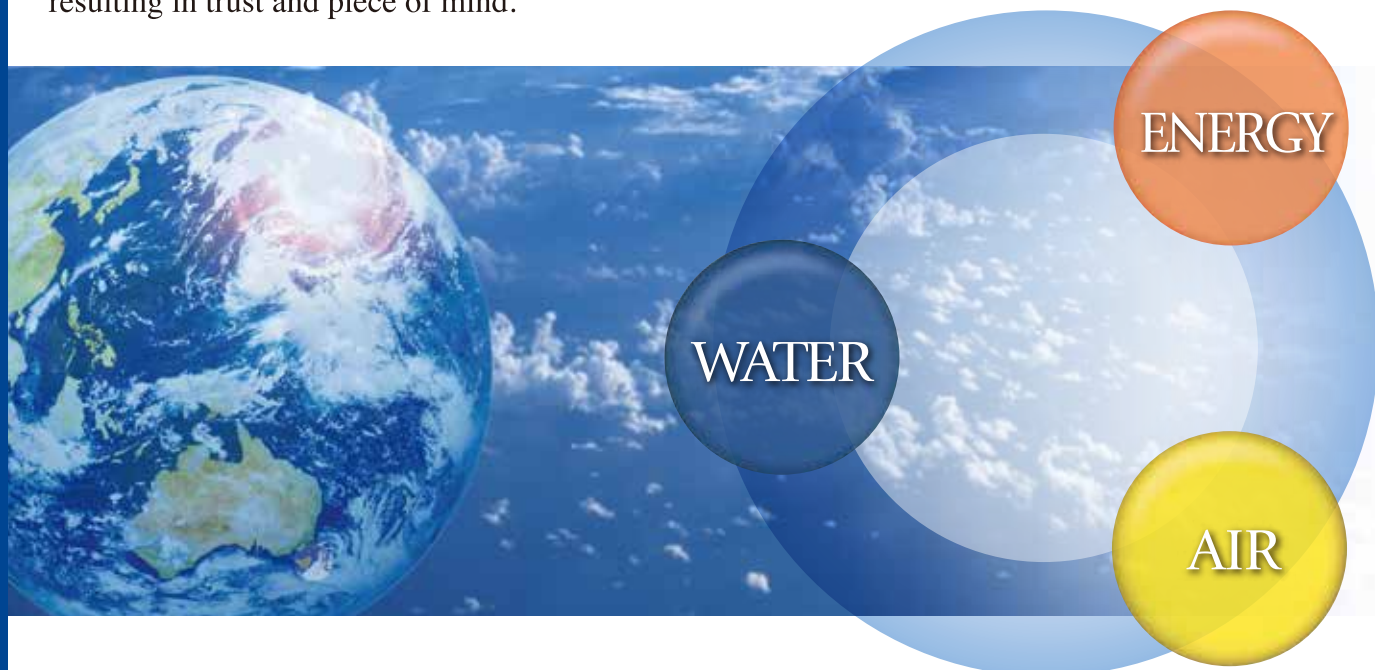

INDUSTRY INCORPORATED

We are aiming to create a comfortable living environment under the theme of “WATER, AIR, and ENERGY”.

ISHII INDUSTRY INC.

We are confidently working on business because of the presence of achievements resulting in trust and piece of mind.

ISHII

INDUSTRY INCORPORATED

Your trust is our confidence.

Three important themes supporting Ishii Industry Inc.

Basic management policy

1. We will advance toward becoming a company constantly counted on and loved by local society on the basis of achievements accumulated up to now and our business attitude through providing more reliable products, engineering work, and services.
2. We will place water, air, and energy in the center of management, expand operations meeting needs such as environmental problems, and contribute to creating affluent societies and comfortable lives.
3. We will actively foster human resources and develop technical capabilities so as to be responsive to the change of the times and the needs of customers while looking into the future.

WATER

For us at the moment ...
For you in the future ...
Ishii Industry keeps advancing.

ISHII

The first important theme

The Divine Origin of Humans – Valued “Water”

Water is the origin of humans and an indispensable valued resource. We will proceed with our business development widely responsive from service water to drainage water and constantly taking account of “3R” – Reuse, Reduce, and Recycle.

- Construction and improvement work on water and wastewater, and agricultural and industrial waters
- Construction, improvement, and maintenance of service water facilities and drainage water facilities
- Purification and improvement work on VOC, groundwater, and soil contamination
- Construction and improvement work on groundwater membrane treatment facilities
- Construction and improvement work on functional water production facilities

AIR

ISHII

The second important theme

We will protect air valuable for all creatures.

Smells, emission gases, CO₂, dioxin, asbestos, etc. disturb the environmental balance while we are unaware.

We will produce clean and safe air by regeneration and improvement based on new technology and various types of engineering along with enacting laws and regulations.

- Construction and improvement work on VOC, deodorization, and dust collection facilities
- Construction work with dioxin and/or asbestos fixed
- Air conditioning, air ventilation, collection of various types of mist, and improvement work
- Construction and improvement work on control and transport systems using air as power

ENERGY

Energy technology developing with the times

We will deal with new energy and energy saving along with the change of the times, repeatedly improve apparatuses to allow use of them in our ordinary lives, and keep utilizing new styles.

ISHII

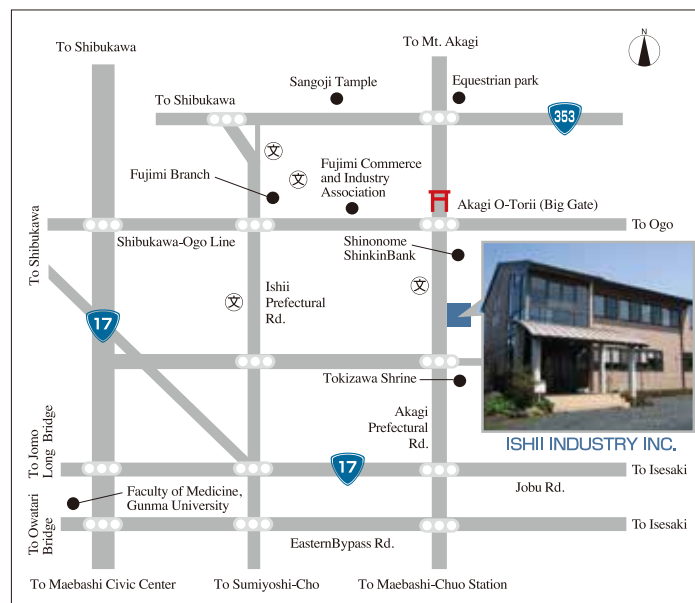

The third important theme

- Proposal and construction/improvement work on facilities for introducing new energies such as wind, water, bio, wave, and temperature difference.
- Construction/improvement work on cogeneration for effectively and/or carefully utilizing existing energies
- Improvement work on facilities/ in areas working on energy circulation based on "3R"
- Proposal and support of ESCO business
- Proposal and support of environmental transaction® by CO2 reduction advisors
- Promotion of smart grid

We will sincerely and constantly develop new skills and knowledge while taking all possible measures, and try to provide advanced services to build trust relationships with customers.

For the bright future

Ishii Industry Inc.
